

Qube / Pixomatic

Junior Front-End Developer

Deadline: 23 February 2018

Employment term: Permanent

Category: Software development

Job type: Full time

Location: Yerevan

Job description:

In this role, you will participate in Front End development of Pixomatic photo editor, Baby Moments and our other applications websites. As a vital team member you will be participating in the development of our world class programs. Total number of our apps downloads is over 1.6 million.

Job responsibilities:

- Front-end development of our websites according to the design files.
- Testing and Debugging of work results.
- Writing and maintaining clean code according to company coding guidelines.

Required qualifications:

- Front-end web application development experience. We are no prior work experience friendly, if you can showcase your coding skills.

- Knowledge and experience in HTML 5, CSS, JavaScript/Node.js, responsive design best practices.
- Knowledge of OOP best practices.
- Experience working with design files. (Photoshop, Zeplin, etc)
- Eager to learn new programming languages and technologies (C++, OpenGL, etc) and the latest best front-end practices.
- Experience working with version controls (git).
- Angular, jQuery, bootstrap, websockets knowledge is a plus.
- Strong debugging, problem solving and investigative skills. Ability to assimilate disparate information (log files, error messages etc.) and pursue leads to find root cause problems.
- Self-starter who can work independently.
- Strong consulting and communication skills. Ability to work effectively with team members in pursuit of problem solutions.

Additional information:

All interested candidates are kindly requested to submit their CVs by e-mail to garik@pixomatic.us . Please indicate the title of the position in the subject line of your e-mail. We are no prior work experience friendly, if you can showcase your coding skills.
