

## iOS Software Engineer

**Deadline: 22 February 2018**

**Employment term:** Permanent

**Category:** Software development

**Job type:** Full time

**Location:** Yerevan

### Job description:

We are looking for open-minded iOS Software Engineer who is passionate about new opportunities in mobile development and has a demonstrable track record of success in delivering new features and products. A commitment to team work, hustle and strong communication skills are absolute requirements.

### Job responsibilities:

- Implement new features and other improvements in the iOS app
- Work closely with Design and Product Management to build the best possible UX for the platform
- Perform code reviews, write unit tests, and contribute to architectural planning and refactoring.

### Required qualifications:

- 2+ years of iOS application development experience in Objective-C or Swift
- Knowledge of the iOS SDK and writing multi-threaded apps
- A solid grasp of fundamental algorithms, data structures and mobile applications
- Ability to effectively articulate technical challenges and solutions
- Bachelor's degree in computer science, a related field or equivalent work experience
- Experience with Git

### Additional information:

We know what you want...

- Competitive salary
- Sustainability and no worries about future
- Code quality and professional approach
- Interesting projects and challenging environment
- Talented professionals eager to share their knowledge
- Training and business trip opportunities
- Flexible vacation and day-off policy
- Health insurance, English classes, Lunch vouchers
- Creative and cozy office
- Freedom and fun
- Massage and this is not a joke :-)
